ELECTRONIC TICKETS

INTEGRATED COMPLIANCE TOOLKIT

END-OF-DAY REPORTING AND RECONCILIATION

## IRESS TRADING SOLUTIONS PROVIDE THE FULL RANGE OF SERVICES REQUIRED BY BUY-SIDE, SELL-SIDE AND RETAIL TRADERS.

### INTEGRATED ACCESS

IRESS trading solutions seamlessly integrate consolidated market data, enhanced institutional and retail trading, DMA solutions and smart order routing with end-to-end trade processing.

Direct integration with algorithmic trading engines and the IRESS BMR provides high speed trade execution across multiple markets.

### END-TO-END VISIBILITY

IRESS's dynamic auditing, search and monitoring tools enable order visibility and tracking throughout the trade and execution lifecycle.

### AUTOMATED ORDER MANAGEMENT

IRESS Trading Solutions offer a powerful tool set to manage, streamline and automate order flow throughout the firm. Order flow can easily be fine-tuned to support all lines of business under a single platform.

### SELL-SIDE INSTITUTIONAL AND RETAIL TRADERS

IOS+ provides enhanced support for the sell-side trader, including low-latency consolidated market data, high throughput order flow, automated order management, DMA, trade and FX management, automated order execution and a full compliance toolkit.

IOS+ also provides comprehensive market data analysis tools, sell-side client order routing, integrated smart order routing and real-time access to trade and position data.

### BUY-SIDE

For the buy-side, IOS+ provides low-latency market data, automated order handling, fast order execution and full order visibility throughout the order lifecycle.

### FAST AND RELIABLE

All IRESS trading solutions run on the IRESS Optical Network (ION), an ultra-low latency fibre network that connects IRESS components. To ensure continuity, IRESS provides fully redundant Canadian data centres.

To further reduce latency and enhance performance, IRESS is co-located with the TMX and Ch-X primary data centres.
